Advanced export presets: Export presets you need to think twice about the video you want and not think twice. The app is a huge huge preset settings for all formats and multimedia devices. You can easily edit them or create a jatt. Able to save audio as well as individual frames of videos Now you can save the audio track or part of it to a video file and create your own soundtrack in any audio format. You can easily save individual frames from the video to your computer. Merge multiple files into one. If you're creating a video with multiple clips, all you have to do is open the source files in the order you need, set the Connect files to one option in the settings, and convert them to any format. Delete video fragments With the built-in editor, you can easily delete any fragment of the video. After the conversion, the fragments are deleted from the resulting file. Split a file into parts If the source file is too large, you can split it into multiple parts at any time. There are two ways to do this: by size and markers. High conversion quality conversion only uses high-quality video processing algorithms, so there is virtually no loss of quality; the quality of the conversion depends only on the inventory you choose. High conversion speed All of our products use multiple processors to speed up their work. In addition, if you have strong graphics on your computer, it can also be used to speed up conversion. Rock solid reliability and stability We've tried to make all our products compatible with all Windows operating systems. You should not have any problems if you use the programs. Download Video Converter Save videos in different formats, you need the best free video converter for the job. Now that honor belongs to all Video Converter Free, which not only converts videos from the desktop to the format of your choice, but also allows you to grab and save videos on all the most popular video hosting sites. However, that's not the only option out there. Depending on what you may need for a free video converter, there are quite a few to choose from. Whether you want to reduce the size of your video file, keep your entire video collection in the same format, or change the video format to something easier to share with others, there's one that suits your unique needs. I've put these options to the test and picked the best free video converter based on its features and ease of use. Keep in mind, however, that if you convert videos from YouTube, downloading videos is against its terms of service. This could potentially be a copyright infringement unless you license the copyright owner or the video to the public. The best video converter available right now: WinX HD Video Converter Deluxe WinX HD Video Converter Deluxe is the best software for converting videos from one format to another. Unlike the tools listed below, it is not free, but it is practically format and uses hardware acceleration to process files, as quickly as possible. You can also manage videos from sites including YouTube and Vimeo, as well as DVD and Blu-Ray discs. (Image credit: AVC) Operating system: Windows, macOS Converts videos hosted online Bonus filters and effects Excellent format support Windows and macOS Something with an excellent selection of supported file formats. All Video Converter Free certainly does not disappoint. Hands down the best free video converter right now, it manages online as well as offline files, meaning that if you like the look of some videos on YouTube, you can quickly and easily convert them into a format suitable for offline viewing on your mobile without worrying about your data allowance. It's not just on YouTube, either; you can also download and convert videos from Facebook, Vimeo, Metacafe and more, and all Video Converter Free also features the option to rip audio CDs and DVDs. You'll find support for all video formats that can be shaken with a stick, including ready profiles for various tools, and editing options like cropping, cutting and rotating to enable basic cleaning tasks. If you want to be creative, you can experiment with video effects to get a unique look. If you need more options, Developer Ansoft also offers a premium video converter, all video converter ultimates that can remove DRM protection, convert videos in batches and burn videos to disk. (Image credit: Wonderfox) Operating system: Windows Seconds to learn built-in editing tools Ready-made device profiles Not 1080p support Free HD Video Converter Factory is proud to be so easy to use that your website includes a 10-second guide to that may seem like an exaggeration, but it's actually true. You can drag the video to the program interface or use the selection menu, select the and press run. That's really it. This is the best free video converter for you if you appreciate the simplicity and smoothness. And I'm happy to let you know that the convenience of the software is not at the expense of the features. Although you can start the conversion process in seconds, you may want to spend a little more time customizing the output. Cutting, cutting and stunning special effects are all on hand to make the videos the desired look, and the way goal formats are presented are very intuitive. Beginners can choose a profile tailored to a particular playback device, while advanced users can manually select things and customize things further. (Image credit: The handbrake team; Shutterstock) Operating system: Windows, macOS, Linux Advanced control options Fast preset Steer format support Basic design support HandBrake is a free video converter that is well known to Mac users but less famous in the world of Windows. It's worth noting that it's still something of a pilot program and hasn't even reached Windows Incarnation version 1.0, but that doesn't mean it should be ignored. Available to Mac, Windows and Linux, Handbrake is a great choice for anyone who works on multiple platform, but is also great for anyone who is dedicated to Windows. A little warning: the other programs featured in this roundup are very accessible interfaces, but the same can't really be said for handbrake. The program is strong, but ugly. There are a lot of features that allow accurate monitoring of video conversion, including cropping, advanced filtering and frame rate adjustment, as well as sets for those who just want quick results. Handbrake may take a while to get used to, but the output is worth it. Read our full review: Handbrake. (Image credit: DVDVideoSoft) Operating system: Windows Batch conversion Clear interface Fast processing videos watermarked DVD VideoSoft is known for its excellent free media software that performs exactly as advertised, and Free Video Converter is no exception. Among the best free video converters is an interface that is clean and tidy, you can convert items into videos with ease. Free Video Converter has a small set of output options (MP4, AVI, MPEG and MP3 are available as well as an option optimized for iOS devices), but it may be a lot if you don't use the work video files and likes the handbrake or MediaCoder look overly complicated. You can choose from quality settings and merge multiple clips into a single file while they are converted. Too bad videos converted with Free Video Converter are watermarked. The signal is not terribly intrusive, but it prevents this otherwise excellent software ranking higher in this list. Read the full review: Free Video Converter.
